The essence of home automation

Home automation should be simple and add comfort to the complexity of the modern home.

Home automation systems are often designed from a technical point of view, while we believe that one should be able to control everything in an intuitive and simple way.

Technology in the modern home is evolving more rapidly than ever, creating enormous possibilities. However, this can lead to systems that are complicated. Too complicated.

We want to keep things simple, intuitive and elegant, both in its form and in its function.

Sentido and Deseo are highly innovative keypads with a minimalist European design, bringing home automation control to a new era. Use Sentido to control lights & screens and complement it with Deseo to control Crestron® HVAC systems. Both keypads are touch-sensitive, creating a unique way of control and an unequalled haptic experience.

Auro is a flush motion sensor: small, fast and almost invisible.
keypads  p4

sentido
the light switch reinvented

The basic idea of Sentido is very simple, yet very innovative.

Divide a square in equal surfaces that each control different functions. The entire surface is touch-sensitive, creating a very easy and unique way of control.

Touching more than one surface at the same time turns on and off all the lights in a room using a general scene. This multi-touch function makes light control highly intuitive and user friendly.
Optionally, up to four additional scenes can be launched by holding the multi-touch for a longer period, which activates the unique RGB scene sequencer.

The internal temperature sensor discretely reports the room temperature to the home automation system.

The multicolor LED backlight can be used for status feedback or simply to light up Sentido in the dark.

The entire keypad is touch-sensitive, creating a unique way of control and an unequalled haptic experience for your Crestron® or Lutron® HomeWorks QS® system.
sentido collection aluminum

Aluminum is a light, strong material. Its sleek look appeals to the most contemporary designers, while the black & white finish blend in any style. Pure Belgian-made quality, right at your fingertips.
2-way

- 4 single touch surfaces * or 2 single touch surfaces *
  each button supports short & long press
- 1 multi-touch **
- integrated scene sequencer
- multicolor LED backlight
- temperature sensor
- visible dimensions: 3.15" x 3.15" x 0.31"*
- combined with Sentido switch – Cresnet (0200-03) or RS485 (0200-01)
- install on European size wall box (0090-01) or mud ring (0090-04)
- custom engraving possible

0201-01 brushed aluminum
0201-02 brushed dark grey
0201-03 brushed black
0201-04 satin white
Bronze, brass, nickel and copper are classics for a reason. Their well-known quality & beauty fit in a wide range of interior styles: the perfect finish for your historic home or the classic touch in your contemporary design. Handmade in Belgium.

enzo

Inspired by Italian design of the late fifties, Enzo combines retro with luxury based on craftsmanship and high-quality materials.

The fine rounded border is made of polished aluminum while the inlay can be leather or glass.

Despite its retro look, Enzo uses the latest technology and features highly sensitive touch sensors and multi-touch capability.

Enzo offers the same unique and innovative functionalities as Sentido.

The integrated multicolor LED backlight makes Enzo visible in the dark and can also be used for status feedback.
The Enzo finishes distinguish themselves as the retro alternative for black or white, introducing rounded edges with a high-quality inlay of leather or glass. The finishing touch to your interior never looked this good before.

Deseo is a beautiful and intelligent HVAC control keypad with touch-sensitive sensors. It offers a simple and innovative user interface for your HVAC system and lets you easily control the lights in the room.

In standby, Deseo shows the current temperature and time. Touch the upper and lower surface to raise or lower your temperature set point. Touch left and right to change fan speed and mode. With multi-touch, you can quickly turn the lights on and off, using a welcome and goodbye scene.

Thanks to its various elegant finishes in high-grade materials, Deseo nicely blends in every interior. Deseo integrates with Crestron® control systems.

- touch controlled menu
- multi-touch functionality
- 1.7” oled display

Auro is everything a motion sensor should be: small, fast and almost invisible. When mounted in the ceiling, the innovative flush design makes Auro completely blend in. Only requiring an opening of 1.7”, it is very easy to install.

Auro has a built-in light sensor to use for light dependent switching, dimming and controlling scenes.

The internal temperature sensor discretely reports the room temperature to the home automation system while it can also be used to trigger a heat alarm in case of an abnormal temperature rise.

With a vertical detection angle of 90° it has a detection area with a diameter of 16 ft when installed at a height of 8 ft, making it perfect for hallways, toilets and small rooms.

Auro integrates with Crestron® & Lutron® HomeWorks QS® systems.
- completely flush design
- visible diameter 2.00"
- visible thickness 0.04"
- 360° range horizontal
- 90° range vertical
- integrated LED for feedback or night light

- integrated lux sensor (only white version)
- available for Cresnet and RS485
- available in white and black

0180-22 Cresnet - white
0180-12 RS485 - white
0180-23 Cresnet - black
0180-13 RS485 - black
Auro is typically installed in ceilings, but there are also numerous applications where it is useful to have a motion sensor in your wall: think near stairway cases where you have an open ceiling, in a hallway or next to the bed.

The optional wall cover lets Auro blend in, as it shares the same form factor and high-end finishes as our exclusive switches, thermostats and sockets.

For a full wall mounted solution, you combine the Auro motion sensor with an adapter and a cover from the aluminum, classic or fer forgé finish collection.
The ultimate comfort is to conveniently control your home technology, but also to feel safe as you walk around the house, even when it’s dark. For those moments, we developed the Via walkway light.

Typically installed at socket height, Via subtly illuminates the floor or steps to help you navigate throughout the house. It has the same form factor and high-end finishes as the Basalte keypads to beautifully blend in any interior.

flush mount

In some projects, the designer or client aims for a sleek, minimalist design. To attend their needs, Basalte developed a flush mount kit that allows to integrate our keypads flush with the drywall. The kit securely mounts the devices, but still allows easy access, insertion and removal.

* the mount is applicable for all Sentido and Deseo finishes.
Enzo and Deseo retro finishes are not compatible.
The Basalte Serial.link is a control interface to connect Basalte RS485 devices with a Lutron® HomeWorks QS® processor.

Serial.link supports a total of 6 x RS485 lines with a maximum of 32 devices per line and requires a power supply of 24V DC.

Serial.link integrates Sentido / Enzo / Auro with Lutron® HomeWorks QS® systems over IP.

The Serial.link is not required to integrate Basalte Cresnet® products with Crestron® systems, as these directly connect to the Cresnet® bus.
